

LFP SERIES 2 LED FLAT PANEL AC-DIRECT DRIVE

SLEEK & ENERGY EFFICIENT

The LFP Series is now available in a highly reliable AC powered constant current “Driverless” format.

Incorporating the latest in LED Module Technology the new panel series offers reliable flat solution for most commercial lighting applications.

The panels are designed to fit directly into existing standard suspended ceilings and recesses, or can be surface mounted or suspended (Surface Mount & Suspension Kits supplied separately). These panels are ideally suited for office lighting and for meeting rooms and common areas such as corridors and access ways.

KEY TECHNICAL FEATURES

- Energy savings up to 60% compared to fluorescent equivalent
- Driverless “Instant Start” operation, no flickering or humming
- Complies with AS/NZS Standards
- Excellent thermal management via large format “Plate Heatsink”
- Mercury free
